## La tradizione al passo coi tempi

Una collezione di articoli per camini e stufe: il risultato di un'attenta e continua ricerca.

Le fasi di progettazione e realizzazione di ogni singolo pezzo, rifinito a mano con grande cura, determinano e garantiscono la qualità degli articoli e la loro durata nel tempo.

Cometa (dal latino Cometes = greco Kometes) "Chioma" propriamente un corpo celeste, bellissimo, che è chioma stessa che gira intorno al sole: alla fiamma che scalda tutti e tutto... Ecco allora perché è stato scelto il nome COMEX per meglio identificare un'azienda italiana che è dedicata all'accessorio del camino, all'accessorio della fiamma: la "chioma" ornamento del focolare. COMEX conta una X in più, per ricordare il nome storico di Brescia = Brixia.

Brescia generosa terra dell'Insubria, madre e referente di tutte le arti metallurgiche fino dalla notte dei tempi, vive nei suoi artigiani, l'antica cultura maestra del lavorare il metallo.

Quando i Romani hanno fatto cittadini di Roma gli abitanti delle campagne e delle vallate bresciane, hanno testimoniato, confermato, condiviso e apprezzato e consegnato a tutto il mondo dell'impero i valori di un artigianato del metallo che non ha confronto: armi, utensili, belli, forti, sono il frutto delle sole mani esperte di questa terra.

La COMEX production nasce nel 1974 dalla tenace volontà artigiana della famiglia Affò, la prima officina di produzione di accessori in ottone per camini e stufe.

La produzione, affinatasi nel corso degli anni, comprende ora non solo articoli in ottone, ma anche una vasta gamma di accessori in acciaio inox, metallo verniciato, pelle e vetro. La maestria artigiana viene tramandata gelosamente da allora fino ad oggi, tanto che attualmente vanta una vera e propria "collezione" di oggetti unici per il fuoco creati su misura: alari, portalegna, bracieri...

## Tradition in keeping with the times

***This collection of fireside accessories is the result of continuous research and testing.***

***All the items are designed and developed to guarantee superior quality and long life and are painstakingly finished by hand.***

*The name COMEX originates from the word comet (from the Latin cometes and the Greek κομητης), with its coma, a celestial body revolving around the sun, which envelops everything and everyone with its warmth.*

*It has been chosen to identify an Italian company that makes fireside accessories. An X has been added as a tribute to Brixia, the Roman name of Brescia.*

*Brescia, which lies at the foot of Alps, has been the benchmark of the metallurgical arts since time immemorial and boasts master craftsmen skilled in the ancient art form of metalworking.*

*When the Romans granted the inhabitants of the Brescian valleys Roman citizenship, they gave recognition to their expertise and conveyed to the whole empire the values of a craft that is truly unique. And this region is still renowned all over the world for the fine weapons and solid tools made here by expert hands.*

*COMEX Production was established in 1974 by the Affò family, and was the first workshop in the area to make brass accessories for fireplaces and stoves.*

*The production range was gradually refined over the years and now, in addition to brass items, features an extensive collection of accessories made of stainless steel, painted metal, leather and glass. The founders passed on their know-how and skills and the company today produces its own collection of exclusive custom accessories, including firedogs, log baskets and braziers.*
